Please note that due to US Dollar fluctuations, prices indicated are subject to change

PHARMACOLOGICAL CLASSIFICATION: Homeopathic Transdermal DermaFusion Patch

PHARMACOLOGICAL ACTION: As soon as the patch is applied, your body heat activates the time-release function of the transdermal patch and the supplement formula begins to transit through the skin for instant and constant delivery over an 8 to 24 hour period. Time-release transdermal adhesives (patches) are the latest, most effective and most convenient way to absorb active ingredients into your bloodstream.

An easy-to-use transdermal patch that effectively and safely increases Glutathione levels in the body to detoxify, reduce free radicals, strengthen the immune system, and ultimately bring out a brighter, healthier complexion.

The transdermal patch delivers to the body, 200mg of Glutathione and 100mg Vitamin C. The absorption rate is 95%. The patch provides a controlled, steady increase in glutathione levels in the body, ensuring zero health risks. It is a safe, painless alternative that can guarantee fairer skin and no harmful side effects.

Glutathione reduces melanin production by suppressing the activity of tyrosinase and converting the eumelanin synthesis to pheomelanin synthesis. It blocks the production of L-DOPA an early step in the pigmentation pathway. Glutathione, when used for the skin, has the following benefits:

1. For most people, the first 3 months use of Glutathione patches is crucial. This is the time when glutathione is building a foundation (body chemistry re-alignment). This is the start of the whitening process. The lightening of the skin is gradual (speed depends on your metabolism and body chemistry). You will notice that your skin is shinier and healthier than before. After this process, you will notice that your skin shade is lighter than before.
2. Glutathione whitens the skin by reducing the melanin production. Melanin causes tanning and darkening of the skin and hair. Sunlight increases melanin production so use sunblock on exposed parts of your body and your face to prevent tanning.
3. There are no adverse side-effects of using glutathione. It has the ability to whiten your skin, strengthen your immune system, promote liver health, and protect against free radicals. These are just a few benefits of the master antioxidant, glutathione.

4. There is no harm in its prolonged use, only long term anti-aging benefits.
5. It is advisable to use glutathione in a patch form because when taken orally, most of the glutathione in pills, liquids, and powders is destroyed in the digestive process. There are other Glutathione supplements on the market, but clinical research shows that common Glutathione pills, powders and drinks can only elevate blood Glutathione levels by little more than 10% in 30 days. Unfortunately up to 98% of the glutathione in a pill or drink form is destroyed by digestion. Because Patch technology is capable of triggering metabolic changes within the cells, our IV PLUS Skin Whitening Patch has been clinically shown to elevate blood Glutathione levels by more than 300% in just 24 hours.
6. For Best Results Use For 6months
7. Very Dark Skin Use for 6-24months
8. Permanent Damage from Chemical Burns resulting from Hydroquinone, Mercury, Steroids, Acid Peels, Post inflammatory Hyperpigmentation from Microneedling and other Banned Ingredients require ongoing treatment indefinitely

COMPOSITION: Each patch contains: Glutathione 200mg, Vitamin C 100mg

Transdermal Patch Construction

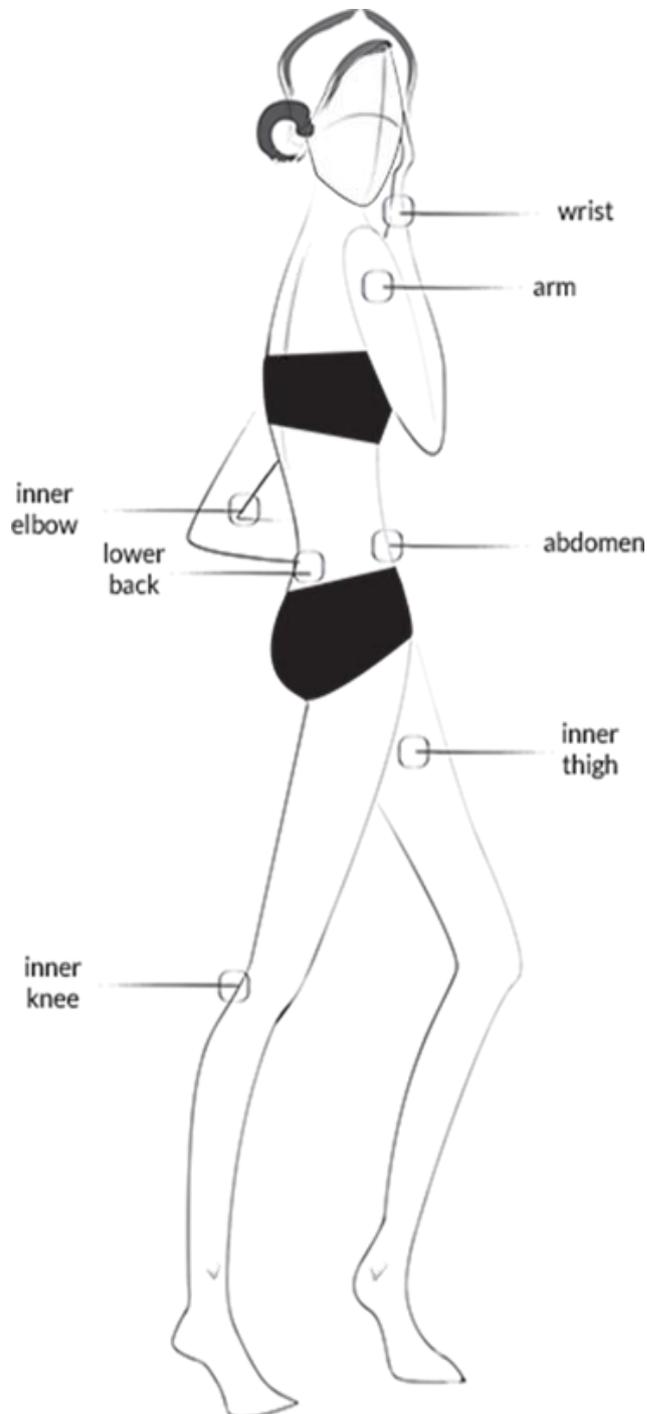

- Liner - Protects the patch during storage. The liner is removed prior to use.
- Formula – Supplement or medication in direct contact with release liner
- Adhesive - Serves to adhere the components of the patch together along with attaching the patch to the skin
- Membrane - Controls the release of the medication or supplement from the reservoir and multi-layer patches
- Backing - Protects the patch from the outer environment

HomeoPatch DermaFusion Transdermal Patch is:

- Safe & Easy to Use
- Potent
- High quality
- Safe and dependable
- Accurate and consistent
- Discreet and stigma free
- Engineered for Results
- Affordable
- Vegan
- Gluten Free
- No Fillers, Colorants, Dangerous Chemicals

DIRECTIONS FOR USE

Best locations on the body to apply Patches – The best locations to apply patches are where there are large concentrations of small blood vessels under the top skin (dermal) layers. The following illustration should be used as a general guide:

Technique - Firmly stick in place 1 to 3 Patches on clean skin and leave for 8hrs to 24hrs. Apply to clean, dry and hair free skin. Start the course with 3 patches per day. Never remove Patch before applying your next patch dosage. Taper down to 2 Patches per day. If you are over 35yrs old or have serious skin care issues remain at this dosage. If not taper down to 1 Patch every application. To prevent any reaction on highly sensitive skin remove patch after 8 hours.

Prepare Your Skin - To ensure comfort, decide where to apply the patch depending on your activities for the day. The best options for placement are the wrists, arms, abdomen, lower back, inner thigh, inner knee and inner elbow. Moisturising Shower Gels, Powder, Lotion, Deodorant etc. will affect the stickiness of the patch. Always apply to freshly cleaned, dry and hair free skin

Apply the Patch - Remove the Patch from the packaging. Peel Patch off the protective strip very carefully, using your fingertip to lift off, do not touch the sticky part of the patch as you will compromise the HomeoPathic ingredients, and immediately apply it to your skin. Press down firmly to secure patch

in place. Do not remove and re-use. Be careful not to rub aggressively over the Patch with soap as it may loosen the patch. Gently dry the wet Patch with an absorbent towel. Please be sure to use clear waterproof tape (E.g. "Tegaderm", "OPSITE FLEXIGRID or similar) over the Patch when swimming in Chlorinated water. This will serve to protect the active ingredients in the Patch. You may to bath with the

patches on as normal tap water does not interfere with the active ingredients.

Patch Removal - Lift patch and peel away swiftly. Do not scratch or rub as this may irritate sensitive skin. Re-Application to be done on the opposite side of the body from last use. Each patch is good for one use. To prevent any reaction on highly sensitive skin remove patch after 8 hours. Use mineral oil or warm water and soap to remove any adhesive residue

INDICATIONS: Homeopathic remedies last indefinitely. There is no shelf life / expiry date because they do not spoil or lose their potency if stored correctly. Homeopathic Transdermal Derma Fusion Patches must be stored in the packaging they come in, away from heat, direct sunlight, microwaves and computers.

SIDE EFFECTS: There are no side effects with Homeopathic Transdermal Derma Fusion Patches. To prevent any reaction on highly sensitive skin remove patch after 8 hours.

WARNINGS: If you have serious health conditions or are taking medications, it is best to consult your physician before using the patch.

CONTRA INDICATIONS: Do not ingest. Use only as directed by your Aesthetician. If you are pregnant, nursing, taking any medications or have any medical condition, please consult your healthcare practitioner before taking any dietary supplement. Seek medical advice in the unlikely event of an adverse reaction. **Only for Adult Use.** Do not use more than 3 patches in 24hrs. The Patch is not intended to diagnose, treat, cure or prevent any disease.

IDENTIFICATION: Each Pack contains 5 sets of 6 patches (30 Patches in total).
